Steve,
Here is the file with Net Sales and Std Margin for the latest official LE for FY12 and FY13 (Apr LE) and the May strat plan without risk adjustments for FY14 to FY17.
Let me know if you want me to add Net Margin (Std Margin less royalties and other product costs).

Exalgo 32 is not included in any official submission.
An alternate scenario was prepared as part of the strat plan and is included in the attached file.

Ron

Steve & Ron

I have attached a spreadsheet with updated information based upon the detail available to me. Ron, this information came from the Brand Strat Upsides Downsides 30 May 2102.xls. I utilized the P&L Sum Base Case w32 (not risk adjusted). This is the latest file I have with FY 12 & 13 forecast updates.

Steve unfortunately I cannot provide Std Margin, but substituted Net Margin. I also do not have the breakdown for the other CNS products. Ron should be able to provide the CNS by product and the Std Margin for all products if needed.

Hope this meets your needs.

Debra

Ron / Debra: can you help address Fluhr's request by Monday morning?

Thanks,
Terry

Subject: Need Your Help!
Jamie and Teri,

I need a favor. Attached is a spread sheet showing Net Sales Forecast and Std Margin for FY 12 - FY 16. The problem is that I only have numbers for 12 and 13. I don't know what your latest forecasts are, and I definitely don't want to guess. Is there any way you can fill in the sales forecasts for the branded products early Monday? Or direct me where to get them?

I've got a meeting with Mark early on Tuesday for an External Manufacturing Review. I'll be rolling up the numbers for totals only after FY13. One of the things I plan on presenting is the revenue stream supported by the External Manufacturing group.

Any help you can give me would be extremely appreciated!

Steve
